Customer Care Registry

Team ID: PNT2022TMID03025

Document an existing experience

Narrow your focus to a specific scenario or process within an existing product or service. In the **Steps** row, document the step-by-step process someone typically experiences, then add detail to each of the other rows.

TIP
As you add steps to the experience, move each these "Five Es" the left or right depending on the scenario you are documenting.

Customer experience journey map

Use this framework to better understand customer needs, motivations, and obstacles by illustrating a key scenario or process from start to finish. When possible, use this map to document and summarize interviews and observations with real people rather than relying on your hunches or assumptions.

Created in partnership with

SCENARIO

Browsing, booking, attending, and rating a local city tour

	Entice How does someone initially become aware of this process?	**Enter** What do people experience as they begin the process?	**Engage** In the core moments in the process, what happens?	**Exit** What do people typically experience as the process finishes?	**Extend** What happens after the experience is over?

Steps
What does the person (or group) typically experience?

- **Face issue** — When a customer has any issue with the product, they look out for a customer care section in the portal
- **Get doubts** — When the customer have doubts about some products, they wish to use a customer care
- **Chat with bot** — Customers can interact with the chatbot available on the home page of the application to get their basic doubts clarified
- **Go-through user manual** — Customers can understand the workflow of the application by reading through the manual available in the portal
- **Raise ticket** — Customers can post their queries/issues by raising tickets
- **Interact with agent** — Customers can have both public and private interaction with the agents
- **View status** — Customers can view the status of their tickets at any point of time
- **View history** — Customers can view the history of previous tickets raised by them
- **Rate the experience** — Customers can rate their experience with the application by clicking the smiley button
- **Provide feedback** — Customers can provide their feedback in the allotted space
- **Query resolved** — Finally, customer query/issue is resolved
- **User satisfaction is achieved** — Customers who got their issues clarified get a feeling of satisfaction

Interactions
What interactions do they have at each step along the way?

People: Who do they see or talk to?
Places: Where are they?
Things: What digital touchpoints or physical objects would they use?
